

Polygon Dreams

Introducing my mini campaign for the platformer game Celeste called Polygon Dreams.

All chapters are done!

I embarked on this project midway through 2018, and it's been great to produce this kind of experience with my own creativity and ideas as one.

I wish to thank all the people who participate in the feedback throughout the making of this campaign, actively and passively.

Without your support I wouldn't be making custom content for Celeste.

General Information:

Technical skill required for my campaign:

- Everything the game teaches you.
- Wave dash.
- Wallbounces.
- Climbing dash.
- You can also do Reverse wave dash.
- For my full length (CH2-3) B-Sides maps you need to know corner grab jumping and neutral jumping.

Installation:

you can download with Everest installer and also manually - just put the ZIP file in the MODS folder, and load up the game with Everest API already installed.

Cool people I should thank:

Matt Makes Games for Celeste, 0x0ade for Everest, Cruor and Vexatos for Ahorn.

and everyone else in the Mt. Celeste Climbing Association Discord!
